

Mid-Course Survey Summary – ECO5435 (Fall 2025)

Overall Experience

Students rated the course experience very positively:

- Very Good: 67%
- Good: 28%
- Neutral: 6%

(No responses rated it Poor or Very Poor.)

Top Components Supporting Learning

The most frequently cited elements that helped student learning were:

1. Videos – Nearly all students mentioned videos as key to their learning.
2. Assignments – Reinforce concepts and support skill-building.
3. Module Overviews – Short introductions help set expectations.
4. Course Structure and Organization – Clear, well-sequenced modules are appreciated.
5. Instructor Feedback – Seen as thoughtful, timely, and helpful.

Students specifically noted:

- The videos are “easy to follow” and “well-explained.”
- The structure makes the course feel “logical” and “manageable.”
- Assignments are effective for “cementing” the material from videos.

Components for Improvement

- Most students selected “None of the other answers are correct,” suggesting general satisfaction.
- A couple of students mentioned minor suggestions regarding course navigation and discussions, but these were framed constructively (e.g., providing peer discussion spaces or supplemental suggestions).

General Comments

The tone of open comments was overwhelmingly positive.

Some representative student remarks:

- “Great course thus far – learning a lot.”
- “My favorite course of the semester.”
- “I really like the videos that are included in each module.”
